

## Performance Report

---

### Product Information

<b>Product Name</b>	SQL Recovery
<b>Version</b>	v6.0
<b>Build Number</b>	3
<b>Releases Date</b>	13 <sup>th</sup> Dec 2013

### Hardware Configuration Test Machine

<b>Operating System:</b>	Windows7 Enterprise
<b>Processor:</b>	Intel® Core™i3 CPU 530 @ 2.93GHz 2.93 GHz
<b>Installed Memory (RAM):</b>	4.00GB (3.80 GB usable)
<b>System Type:</b>	64 bit Operating system

### Test Data

<b>File Size</b>	20 Gb
<b>Total Record Count</b>	3,210,091

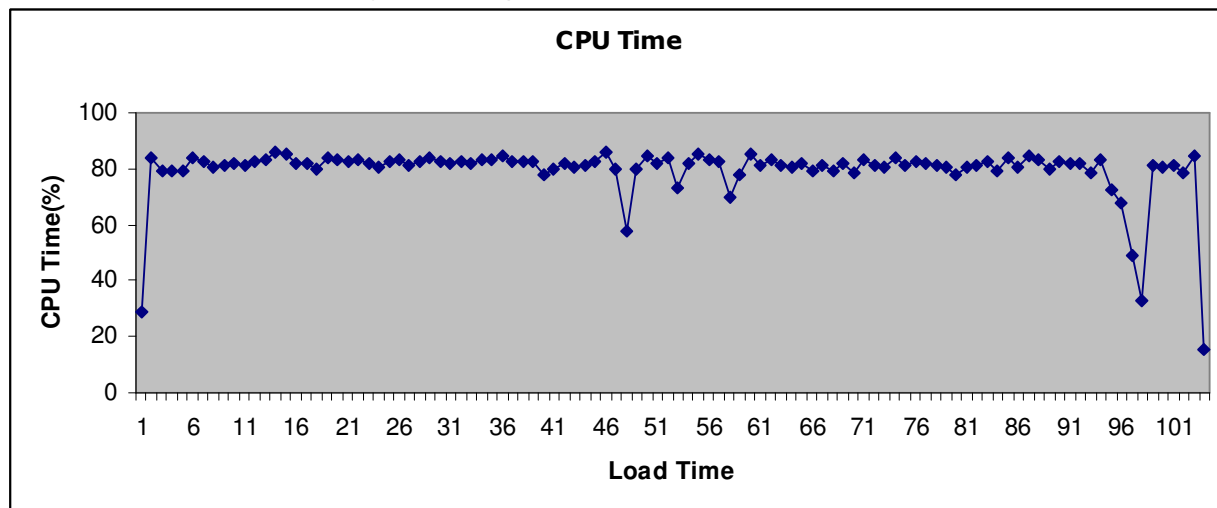

### Result

#### Conversion Rate

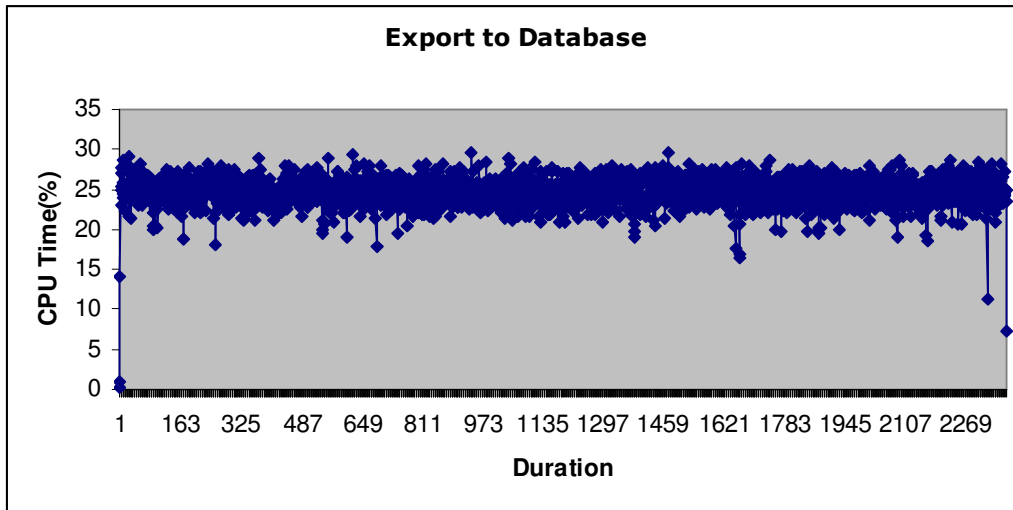

<b>Time Taken</b>	630min
Conversion Rate	32.50 MB/min

#### CPU Utilization

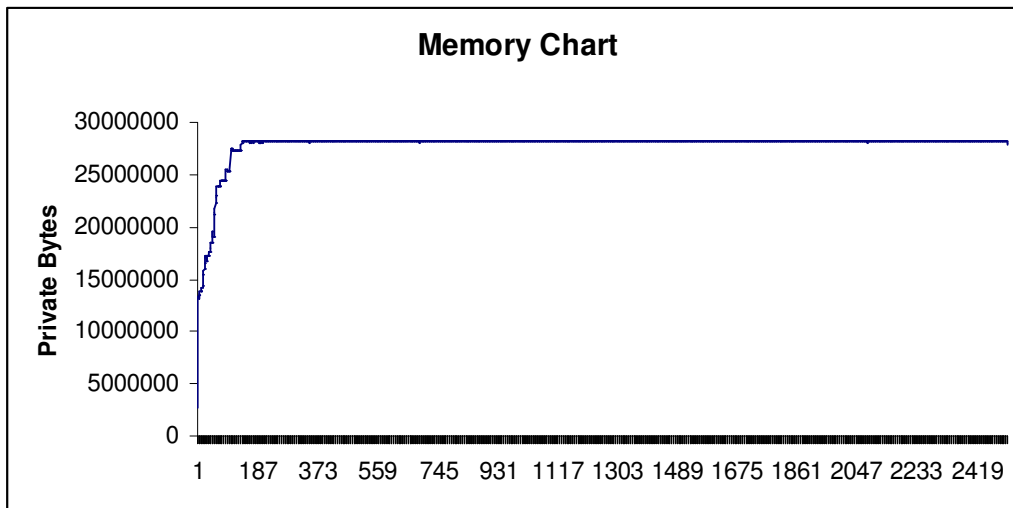

CPU Utilization while loading the corrupted SQL Server MDF file of size 20 GB

CPU Utilization while exporting the SQL Server MDF file of size 20 GB to SQL Server database.

Private memory Utilization while exporting the SQL Server MDF file of size 20 GB to SQL Server database.

Virtual memory Utilization while exporting the SQL Server MDF file of size 20 GB to SQL Server database.
